

LEVEL 2 HACCP

COURSE CONTENT OVERVIEW

0333 006 7000
www.highspeedtraining.co.uk

This Level 2 HACCP course has been designed for workers of all levels within a food business, including catering, retail and manufacturing premises. By taking this course it helps your company to ensure compliance with EU Regulation (EC) No 853/2004 on the hygiene of foodstuffs – the law that requires all food premises to have an effective and efficient food safety management system in place. This Level 2 HACCP course will aid you to understand why and how a HACCP system is implemented, what the essential principles of HACCP are and what you can do to ensure the food you handle is safe for consumers to eat.

Module One: Introduction to HACCP

This module explains the purpose and benefits of implementing HACCP and provides definitions for some of the key terms used. The module outlines the food safety legislation that all businesses must comply with.

- What is HACCP?
- Key terms
- Legislation
- Benefits of HACCP
- Enforcing the law

Module Two: Food Safety Hazards

This module provides an overview of the different types of food contamination and lists examples and possible sources for each to help you understand why a HACCP system is important.

- How contamination applies to HACCP
- Physical contamination
- Chemical contamination
- Microbial contamination
- Allergenic contamination
- Cross contamination

Module Three: Principles and Prerequisites

This module looks at the importance of having basic food safety control measures in place before implementing a full HACCP system, based on the 7 principles of HACCP.

- The 7 principles
- Examples of prerequisites
- Effective prerequisites
- Assessing prerequisites

Module Four: Creating a HACCP System

This module looks at the steps that need to be followed before a completed HACCP system can be implemented. The module explains how members for the HACCP team are chosen and why it's necessary to create flow charts for your work processes.

- The basics of HACCP
- Create a HACCP team
- Describe the products and ingredients
- Identify the products' uses and consumers
- Construct a flow diagram
- Confirm the flow diagram

Module Five: The 7 Principles: Hazard Analysis and Control Measures

This module outlines the first three principles of HACCP and looks at how your business can determine the significant food safety hazards. The module also explains critical limits and how they should be established.

- The 7 principles of HACCP
- Hazard analysis
- Determine critical control points
- The codex decision tree
- Establish critical limits

Module Six: The 7 Principles: Monitoring and Verification

This module looks at the four further principles of HACCP and explains how food businesses can monitor the identified hazard, act in case of emergency and check to ensure that the HACCP system continues to work effectively.

- Monitor critical control points
- Establish corrective actions
- Establish verification procedures
- Reviewing the HACCP plan
- Record keeping

Aims of the Training
